Name of the study program	Nursing
Qualification level of the European Qualification Framework	6
Faculty	Faculty of Health Sciences
Department	Department of Nursing
Form of study	Full-time studies
Degree	Bachelor (BA)
Specialisations	
ECTS credits	184
Study time	3 years (6 semesters)
Purpose of study and organisational arrangements	<p>The aim of the nursing education programme is to provide students with present-day knowledge in health sciences and medical sciences, to train skills and social attitudes. The implementation of the training programme assumes the preparation of a cadre of highly qualified nurses with theoretical and practical knowledge for the fulfilment of professional tasks.</p> <p>Candidates who hold a secondary school leaving certificate may be admitted to the degree programme after fulfilling the formal requirements included in the ANSG Study Regulations and relevant resolutions and regulations of the university's bodies on recruitment for a given academic year.</p> <p>There is an entrance exam for the Nursing degree programme, which includes a test of competence and aptitude to practice as a nurse. In addition, because of the high level of interest, there is a limit on vacancies per academic year.</p>

Profile of the graduate	<p>Graduates of the Bachelor of Science in Nursing have general medical knowledge, specific knowledge of nursing and demonstrate knowledge of the legal regulations, ethical principles and deontology relating to the nursing profession. Is able to use current knowledge to ensure safety and a high level of nursing care. Provides health services in the field of health promotion, health maintenance and disease prevention. Provides holistic and individualised care to patients in various health and/or illness and life-threatening conditions. Is able to communicate effectively and empathetically with the patient and/or their family. Is able to organise own work and collaborate within the therapeutic team. Shows initiative and supports community health activities.</p> <p>Graduates of the Bachelor of Science in Nursing have general medical knowledge, specific knowledge of nursing and demonstrate knowledge of the legal regulations, ethical principles and deontology relating to the nursing profession. Is able to use current knowledge to ensure safety and a high level of nursing care. Provides health services in the field of health promotion, health maintenance and disease prevention. Provides holistic and individualised care to patients in various health and/or illness and life-threatening conditions. Is able to communicate effectively and empathetically with the patient and/or their family. Is able to organise own work and collaborate within the therapeutic team. Shows initiative and supports community health activities.</p> <p>He or she is prepared to fulfill his/her profession independently in accordance with general and professional ethics and is able to respect the rights of the patient. He/she can critically analyse his/her own conduct and draw conclusions and is ready for continuing professional education.</p>
Foreign languages used in lectures	<p>The preferred foreign language, the mastery of which, to the extent stipulated in the study programme, will enable the expected learning outcomes is English. This is because of the necessity for students to acquire English-language medical terminology that is widely used internationally, but also nationally.</p>
Student internships	<p>Practical training is conducted in accordance with the Standard of Education contained in the Regulation of the Minister of Science and Higher Education of 26 July 2019 on standards of education preparing to practice the profession of doctor, dentist, pharmacist, nurse, midwife, laboratory diagnostician, physiotherapist and paramedic</p>

	(consolidated text, Journal of Laws of year 2021, item 755, as amended), the ANSG Student Practice Regulations constituting an annex to the ANSG Rector's Order No. 13/2022 of 1 October 2022 and the faculty's practice guidelines for the Nursing field of study. The proper course of practice is supervised by the faculty's practice supervisor, who, in addition to the substantive supervision, provides assistance to students in the course of practical training.

Legend:

(A), (B), (C), (D) - groups of subjects according to current educational standard

(extra.) - additional classes

E, g/a, P - forms of obtaining credit: E - exam; g/a – garded assignment, P - P - pass without evaluation

PP - professional practice

SS - self-study

MCMS - Monoprofile medical simulation centre

(c), (n) - parts of the course: (c) - clinical, (n) - nursing
